-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE _____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15- 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the relationships between at least one input port, at least two output ports, and an ATO element.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2874

Claims 1- 6, and 15-17 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Huibers et al [USPAT 6,337,760].

Huibers et al disclose an optical device comprising:

A pair of opposed optical arrays [see front drawing], each optical array including a plurality of independently tiltable mirrors and a fixed mirror [note that once one of the tiltable mirror is fixed into certain angle, then that mirror is considered a fixed mirror];

At least one input port;

At least two output ports; and

An ATO element [lens, see column 1, line 29].

In re claims 2 and 3, the claimed characteristics of ATO element are inherently met by Huibers et al device.

Claims 1-20 are further rejected under 35 U.S.C. 102(e) as being clearly anticipated by Huber et al [USPAT 6,687,428].

Huber et al disclose an optical switch comprising:

At least one input port [fig. 3A];

At least two output ports [30];

An angle-to-offset element [SLM array, see fig. 4 for detail];

A first and second plurality of independently tiltable deflectors [see array of SLM in fig. 4 and 8], and

At least one fixed deflector [one of 48s in fig. 4].

In re claim 11, Huber et al show MEMS chip in fig. 7 and 8.

In re claim 12, Huber et al show a concave mirror 48 in fig. 4.
